BYRON YOUNG

JUNIOR SOFTWARE DEVELOPER

PROFILE

Junior software developer with two years' experience in a software development environment. I have completed my diploma in Information & Communication Technology at Cape Peninsula University of Technology. I am an excellent communicator, problem solver, and team player. My career objective is to become a Full Stack Developer, as I am constantly seeking opportunities to learn new technologies to improve my skills. I am excited to bring my skills and passion to a new role in the field of software development.

WORK EXPERIENCE

Cape Peninsula University of Technology

JULY 2023 - DEC 2023

Intern Developer

- Assisted in editing and maintaining project documentation.
- Developed a prototype Virtual Machine request application.
- Worked with team members using GitHub for version control and collaboration.

University of Western Cape

MAY 2018 - MAY 2019

Intern Developer

- Worked closely with a senior developer to design and implement an application utilizing SQL Server Integration Services (SSIS).
- Assisted in documentation and quality assurance processes.
- Collaborating with team members on GitHub.

Web 2 Web

MAY 2017 - NOV 2017

Intern Web Developer

- Designed and developed webpages for clients, ensuring responsiveness and functionality.
- Managed and updated website content to align with client requirements.
- Implemented SEO best practices to enhance client online visibility.

PROJECTS

Good Eats Restaurant ASP.NET MVC Web Application

I developed a restaurant order web application using ASP.NET MVC and Razor Pages, utilizing Microsoft SQL Server for database management. ASP.NET Identity was implemented for secure authentication and role-based authorization. Sessions have been integrated into user-specific cart tracking, enabling easy ordering. I designed a user-friendly interface to allow customers to browse menus and place orders, along with a dashboard for administrators to manage their menus and orders. I deployed the application on Microsoft Azure using Azure App Services and Azure SQL Database.
